High Leverage Lean Implementation

The SBTI Lean Leader is a high leverage approach to Lean implementation in your business. Traditional Lean implementations is led by outsiders and skills transfer is inconsistent or non-existent. The SBTI program will arm your future leaders with a full Lean toolkit while providing the guidance necessary for a successful Lean methods implementation. Comprehensive in its approach, and powerful in its impact on the bottom line, the Lean Leader program will redefine your competitive advantage in your market while radically improving the skills of your best people.

Typical Lean Leader Implementation

Lean Leader Impacts your Bottom Line & your Top People

The Lean Leader program is ideal for either companies who have already implemented Six Sigma or for companies who are at the beginning of the continuous improvement journey. Lean Leader is the solution to driving Lean into every part of your business.

This program is customized to fit the needs of both manufacturing and non-manufacturing environments. Key elements of the program include:

- Kaizen Roadmap, Planning and Execution
- Kaizen Case Studies and Best Practices
- Group and Business Change Management
- Lean Implementation Design and Roadmap

Our Clients Say It Best

"In my 25 years with the company, this was the best 'applied' training opportunity I've experienced".

-Jeff Sheetz, Six Sigma Black Belt & Lean Leader, Tyco Electronics

"We just got done doing our 5th wave of Lean Leader... One project eliminated the need for a \$400,000 building expansion that was on the capital plan for next year".

-Rodney Duis, Lean Leader, Celanese Chemical
