- 1/3 - Fresh Eyes from Outside the Process

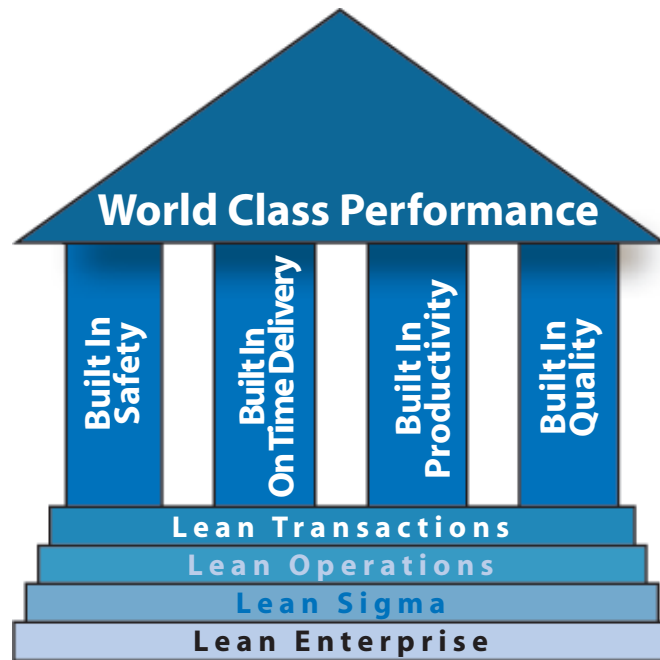

Accelerating Breakthrough Improvements

Kaizen Literally Translated from the Chinese Words: Kai=Change and Zen=Good

One of the most powerful tools in the Lean Toolbox is the Lean Kaizen. Kaizen events target major problem areas based on value to the customer and to the business. The Kaizen Event is a well-defined improvement effort that occurs over 4.5 days of intensive teamwork. A tightly focused Charter is written with clear and challenging goals that will stretch your team to achieve amazing results. An SBTI expert facilitator or a trained Lean Leader® guides the team through the Kaizen event from the selection of the tools, process mapping, through the stages of process improvement to final control plans and key deliverables. When the event is completed your company will have a better process with improved quality, higher speed, and no waste. SBTI's successful history of Kaizen deployments guarantee dramatic bottom line results.

Kaizen Target Examples:

- | | |
|----------------------------------|-------------------------------------|
| ■ Sales & Marketing | ■ Procurement / material management |
| ■ Order taking and scheduling | ■ Logistics |
| ■ Product or service development | ■ Administrative systems |
| ■ Manufacturing | ■ Human Resources |
| ■ Engineering | ■ Maintenance |

Our Customers Say It Best

"In my 25 years with the company, this was the best 'applied' training opportunity I've experienced".

*-Jeff Sheetz, Six Sigma Black Belt & Lean Leader
Tyco Electronics*

"It was not until my participation in a Kaizen event at the OSI St. Mary's facility before I truly 'got it'The Kaizen methodology to continuous improvement is a truly remarkable method for visible change at high velocity"

*- Andrew Edwards, Cost Reductions Project Manager
